Why wait on the weather

-when electricity dries

fresh-air sweet indoors?

Only Electric Dryers can do it. In an electric dryer, radiant coils warm the air inside. There's no flame, none of the by-products of combustion. It's cleaner and purer than any other way of drying. 32% fluffier than back-yard drying - and electric drying doesn't fade colors.

Electric dryers not only cost less to buy, but less to maintain. Before you wait on the weather again, see the new electric dryers at your appliance dealer.
